GREAT WESTERN TELEGRAPH

Raise Money. Cniesoo, Nov. 30,

The Tribune this morning makes an ex-posure of a financial transaction of the Great Western Telegraph Company, which has two lines in operation from Unis city—one to Milwaukee, and one to Omaha—which, if true, offers something new in schemes for raising money. The Tribune says:

"The capital stock of the company i

three millions, in 120,000 shares, at \$25 each. Of 120,000 shares, constituting the whole of the stock, 117,897 shares were subscribed by one Selah Reeve, and by subscribed by one Selah Reeve, and by him conveyed to Josiah Snow, in trust on the company to sell the same and pay avails back to Reeve, in fulfilment of a contract made by the company with Reeve to construct 2,000 miles of the company's line. In accordance with this the stock is being sold by the company throughout the country. One of the by-laws of the company, provides that no certificates of stock shall be issued until forty per cent of the whole shall have forty per cent of the whole shall have been paid in, and, as it is left entirely op-tional with the company as to when and how much the assessment under forty per cent on the stock may be, it seems probahle that those who subscribe for stock on these conditions are likely to wait some time before they have any voice in the election of directors or management the stock and property of the company. The names of twenty-two of the most respectable business gentlemen of this city are published as directors, and though these have been formally elected by the company, it is alleged that none of them have been qualified as directors, and that they know nothing of the business transactions recently. A suit has been brought by some persons in this city who sub-scribed for stock. They file a bill alleging fraud in the contract made by the company with Reève, in which it is agreed to pay him at the rate of \$300 per mile, for a line

him at the rate of \$300 per mile, for a line of poles lunished with one wire, and an additional \$100 per fulle for each additional wire, viz. \$400 per mile when the poles in are furnished with two wires; \$500 per mile when furnished with three wires, and \$600 per mile when furnished with four wires. It is alleged that a line of poles with one wire can be erected for from \$125 to \$130 per mile. This allegation is sustained by the testimony of at least one half dozen telegraph builders of experience and established reputation. It this company should pay Reeve at the rate of \$300 per mile, it would leave a net profit of \$440. should pay Reeve at the rate of \$300 pe mile, it would leave a net profit of \$440,

000, and when he had furnished the full compliment of four wires making the to tal cost to the company \$600 per mife. The net profit on his contrast would be about \$700,000, the forty per cent of money which the stock holders are to pay in before any certificate of Stock are to be issued to them, would amount to \$120,000. This corresponds to the amount of the construction con-tract to Reeve at \$600 dollars per mile, which amounts to just \$1,200,0000. The construction contract and the payment on the stock are arranged so that the money paid in shall be paid out to Reeve, before the stockholders have received any

certificate of stock, or have any voice in the disposition of their money." MISSOURI.

The New York World says the proba-ble contents of the Secretary of the Treasury's report to Congress, and the policy he may pursue in regard to the large sales of gold and purchases of bonds and also contraction of greenbacks, are the chief topics of discussion in financial circles. The impression prevails that the Secretary will recommend contraction of
